**Review of Salad Rain** Jul 28, 2015 2:14 AM

[Rudy Thurston](#)

- Game is not centered in template

- Right now you have to hold the mouse button down and drag the salad bowl, can it be like waterdrops where moving the mouse moves the bowl, no click needed?
- Sound package was sent, have sounds been added? I am not hearing them if so.
- The timer is getting covered up can you move to a new location that it will fit? Maybe under the recipe on the upper left

- Take a look at the notes, the screen should flash when a meter is full with the color of the item that is filled/full meter.
- Please add the effect for the star and add the star/speed when caught
- Timer should flash when there is only 10 seconds left, timer should count down rather than up (from 1:30 down)
- I only win the level, even if i fail it by not filling the meters
- More Items (overall) should fall on each level by about 15%
